SUMMARY

Android developer with 2 years building production software, specializing in native Android development using Kotlin and Jetpack Compose. Full-stack range across React, Node.js and Python for freelance web platforms. Builds and ships complete apps end-to-end — architecture, CI/CD, and Play Store releases — entirely from a mobile device, with no desktop or laptop in the workflow.

EXPERIENCE

Independent Android & Full-Stack Developer

Freelance / Self-directed products · Ongoing

- Designed and shipped SpendWise, an AI-powered expense and subscription tracker, integrating the Gemini API for categorization and ML Kit OCR for receipt scanning, with fully offline Room-only storage.
- Took ScanMate AI Pro through 15 iterative production-hardening rounds (6.4/10 to 10/10), adding full-text search, AES-128 password-protected PDF export, a biometric-locked vault, auto-deskew, and business card-to-vCard extraction.
- Built VaultClean AI, a storage-cleaning utility with AI-driven cleanup suggestions, a full in-app billing system, AdMob integration, and a Room/Coroutines architecture across 49 Kotlin files.
- Shipped PowerMate AI, a battery and charging diagnostics app, resolving CI/CD pipeline failures in GitHub Actions (AGP/Gradle conflicts) and delivering a full UI/UX overhaul.
- Audited and restructured a React/TypeScript/Vite business directory web app, planning its split into 10 standalone deployable sites for local business clients.
- Set up and manage GitHub Actions CI/CD pipelines producing debug and release Android builds without local build tooling.

Developer Content Creator — Vibe Dev PK

Faceless YouTube channel · Ongoing

- Creates beginner-friendly Android development Shorts, produced and edited entirely on-device using KineMaster.

PROJECTS

SpendWise — AI expense & subscription tracker — Kotlin, Compose, Room, Gemini API, ML Kit
VaultClean AI — Storage-cleaning utility — Kotlin, Compose, Room, AdMob, Play Billing, Firebase
PowerMate AI — Battery diagnostics app — Kotlin, Compose, GitHub Actions CI/CD
ScanMate AI Pro — Document scanner with encrypted vault — CameraX, ML Kit, Room, Flow, iTextG
Signal — Single-file Gemini-powered chat app — JavaScript, Gemini API, marked.js, DOMPurify

SKILLS

Android

Kotlin, Jetpack Compose, Hilt, Room, Coroutines/Flow, CameraX, ML Kit

Full-stack

React, TypeScript, Node.js, Python

Tooling

GitHub Actions CI/CD, Gemini API, Google Play Console, Gumroad
